## **PROXIMAL SECURITY LAUNCHES IN NEVADA**

*Security company manufactures all aspects of protection and surveillance for one-stop-shopping experience*

December 22, 2008 (Henderson, Nevada) - Quality comes first at Proximal Security, a new company headquartered in Henderson, Nevada.

Proximal Security (<http://www.proximalsecurity.com>) is a business-to-business company producing and marketing the latest in security and surveillance technology products directly to distributors, security companies and other businesses around the world through its sales team and online catalog.

Proximal offers security-related businesses the opportunity to not only save time and money, but to purchase quality equipment backed by the company's two year guarantee, which exceeds the industry average.

"Many security companies now go through as many as 20 different suppliers to get product to sell to customers," says Vice President Scott Schliep. "At Proximal Security, we offer a one-stop-shopping experience."

Proximal Security manufactures and markets its own products, including eight different models of surveillance/security cameras and its own digital video recorder line, in addition to video analytics. By cutting out multiple middlemen, Proximal provides clients with quality products at rates that are beyond competitive. In addition, as the original manufacturer, Proximal Security also custom builds to specification for their clients.

"In economic downturns like we're seeing, security and savings are more important than ever. But you can't compromise one over the other," says Schliep. "At Proximal you don't have to."

Proximal Security's customers include security equipment distributors, integrators, alarm companies, electricians, locksmiths, low voltage companies and other businesses specifying and installing security, surveillance and access control products.

Proximal Security is located at 18 Sunrise Drive, Suite G70, in Henderson, Nevada, 89014. Proximal Security, which has multiple manufacturing plants, may be reached at (702) 855-3800.
